

# **BRIGHT CANCER CARE**

**Leave a gift in your will to help provide a brighter future for  
liver, pancreatic, bowel and gastrointestinal cancer patients**

If you leave a gift in your will to the BRIGHT Cancer Care Charity, you will enable us to provide vital equipment used in treatments including surgery, chemotherapy, immunotherapy and radiotherapy.

## **YOUR LEGACY**

You may want to leave a legacy to BRIGHT to honour the care you or a family member has received, or to pay tribute to a loved one. Your gift will look to the future and help BRIGHT fund the research and care that is important to you.

Donate today via  
this link with JustGiving

BRIGHT fundraising aims to support ground-breaking research to improve treatment options and outcomes for all GI and HPB cancer patients.

With over 25 years of support from the charity, many innovative treatments have evolved - it is vital that we continue this work with help from our supporters, for a brighter future.

The BRIGHT Charity also enables medical personnel and consultants to gather and publish data and evidence, influencing change in future practices and pave the way to a wider choice of treatments and improved outcomes.

## A BEQUEST TO BRIGHT CANCER CARE CHARITY WILL HELP FUND:

- Comfortable reclining chairs for cancer patients during treatment.
- The research team – technicians, nurses, computer scientists and data controllers.
- Research training and development.
- Laboratory analysis of pancreas cancer cells to identify targets for future treatment.
- The running of a national clinical trial, delivering quality of life improvements after cancer care.
- Autostainer machine to prepare tumour tissue slides - faster impact on research.
